

Build 53

Update Details:

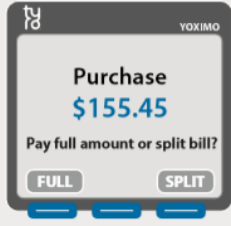

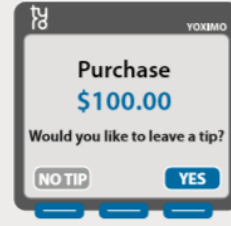

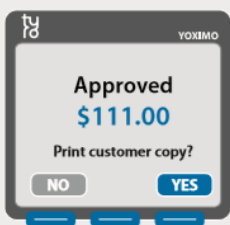

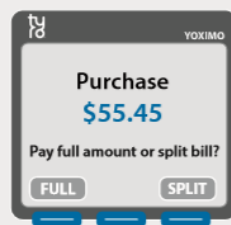

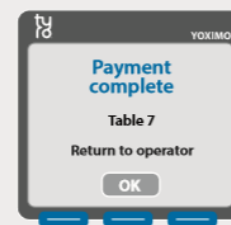

** Enhancements

- * [IP-502] - Support for Tyro Pay@Table Surcharges
- * [IP-1271] - StockManage - Support for Price Changes functionality
- * [IP-1481] - Support for Fiji VAT Monitoring System
- * [IP-1866] - Manufacture Items - multiple items can be processed in a Batch
- * [IP-1886] - Inhibit accrual of Gross minus Nett gaming points where the nett tender is points-inhibited
- * [IP-1909] - Konami Gaming - support for retrieving Member Image
- * [IP-1938] - Promotions Report - option to Group by Location
- * [IP-1815] - Xero API - automatically set Xero Accounts to Enable Payments

EFTPOS Surcharges

Support for Tyro Pay@Table Surcharges

This function adds the ability for Tyro EFTPOS to support surcharges when using the Tyro Pay@Table feature.

- 01 Staff print the bill and bring it over to the customer/s**

- 02 Staff enter their Operator ID**

- 03 And the corresponding Table Number**

- 04 Amount and splitting option are displayed on the screen**

- 05 If customers choose to split the bill, they then enter their share**

- 06 Intuitive prompts will guide them to tip**

- 07 If they wish to tip they can enter tip amount**

- 08 The tip is then added to the amount and they pay using their card**

- 09 If surcharging is activated, a surcharge is added to the total bill amount - not including the tip**

- 10 The payment is approved and you can print a receipt**

- 11 The remaining bill amount is displayed on the screen and the next customer can pay at their leisure**

- 12 Payment is completed, POS is updated and the table is now closed**

idealpos7 Update History

Gaming Interface

Konami Gaming – Support for retrieving member image

This function adds support for retrieving the Konami Gaming Member from the Konami Gaming Server/Database.

Go to Setup > Global Options > Gaming > Get Photo

The screenshot shows the 'global options' window for 'site 1 (Site 1)'. The 'Gaming' tab is selected. The 'Gaming Interface' section contains the following settings:

- Interface Type: Konami
- Redeem Tender: POINTS
- Unit Id: [Empty]
- IP Address/Host: [Empty]
- Port: [Empty]
- Add Members to POS
- Code Length: [Empty]
- Customer Type: 1
- Use Price Level Schedule
- Use Membership ID
- Redemptions treated as Discounts
- Get Photo (highlighted with a blue box and an orange arrow)

The 'StarrSrv Interface' section contains the following settings:

- Use StarrSrv
- IP Address: [Empty]
- Redeem Tender: EFTPOS
- Redeem Tender 2: EFTPOS
- Interface Type: IRC
- Customer Timeout: 0
- Rating Points per Dollar: [Empty]
- Add Members to POS
- Scan Code
- Membership ID
- Update Customer Type from Member Price Level
- Update Customer Type from Member Rating Grade
- Redemptions treated as Discounts
- Customer Type: [Empty]
- Length: 0

The 'Tickets' section contains the following settings:

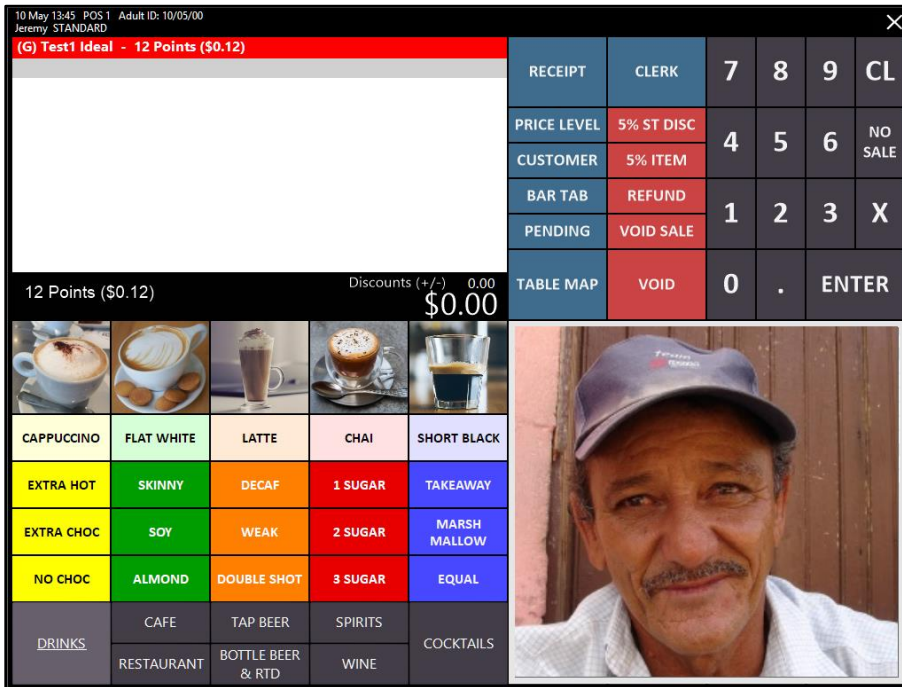

- None
- One Only
- Multiple by Threshold
- Multiple by Points
- Use Price Level Schedule
- Copies on Detailed Statement
- Maximum PO Amount: 0

The 'Gaming Points' section contains a table with 10 rows and 5 columns:

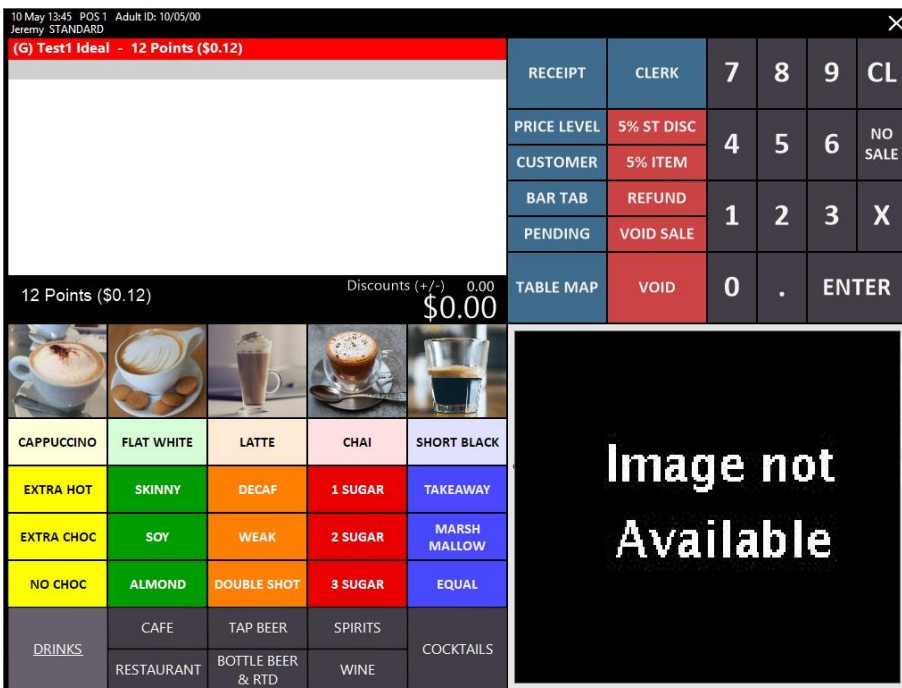

Enable	Description	Code	Points Per \$	Point Value
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>				

At the bottom of the 'Gaming Points' section, there is a checkbox: Combine Accounts into one Redeemable Total

When adding a Konami Gaming Member to the POS transaction, the image for the member will be retrieved from the Konami Gaming Server/Database and displayed on the POS Screen.

In the event that the member image is unavailable, the system will show 'Image not Available'.

idealpos7 Update History

Manufacture Items

Multiple items can be processed in a Batch

This function replaces the previous functionality of manufacturing a single item one at a time.

When manufacturing items, the process now involves adding Manufactured Items to a batch, then once all the required Manufactured Items have been added to the batch, the batch can be processed which will manufacture all the items in the batch at once.

If a single item needs to be manufactured, a batch can be created, then simply add a single item to the batch, followed by processing the batch which will manufacture the item within the batch.

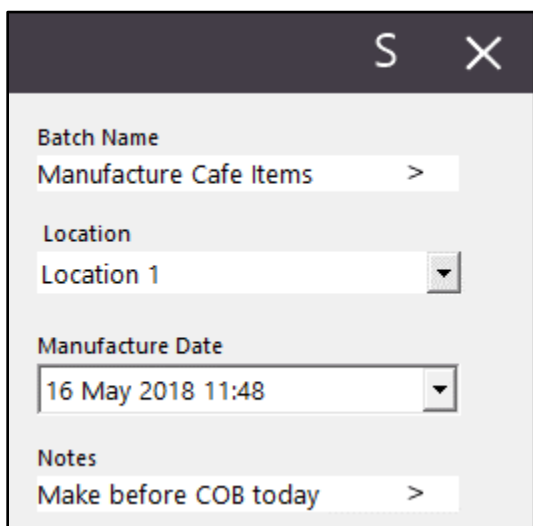

Go to Transactions > Stock Control > Manufacture Items > Add

The screenshot displays the 'manufacture batches' window. At the top, there is a search bar and a dropdown menu for '--Date Manufactured--'. Below this is a table with the following columns: ID, Batch Name, Location, Date Manufactured, Notes, and Processed. The table is currently empty. At the bottom of the window, there is a toolbar with several buttons: 'Add', 'Modify', 'Delete', 'Copy', 'View', 'View All', and 'Process'. The 'Add' button is highlighted with a yellow box, and an orange arrow points to it from the left. Additionally, there is a 'Show All Batches' dropdown menu and a 'Send to Label Printing' checkbox in the bottom right corner of the toolbar area.

The Manufacture Items screen will be displayed.

On the right-hand side of the screen Manufacture Items screen, you will see the below options.

Give the Batch a name, select the Location where the Manufactured Item will be manufactured, the Manufacture Date along with any notes for the batch.

The screenshot shows a window titled 'S' with a close button 'X'. It contains the following fields:

- Batch Name:** A text input field containing 'Manufacture Cafe Items' and a right-pointing arrow.
- Location:** A dropdown menu showing 'Location 1'.
- Manufacture Date:** A date and time picker showing '16 May 2018 11:48'.
- Notes:** A text input field containing 'Make before COB today' and a right-pointing arrow.

After you have filled in the above details, you may add items to the batch.

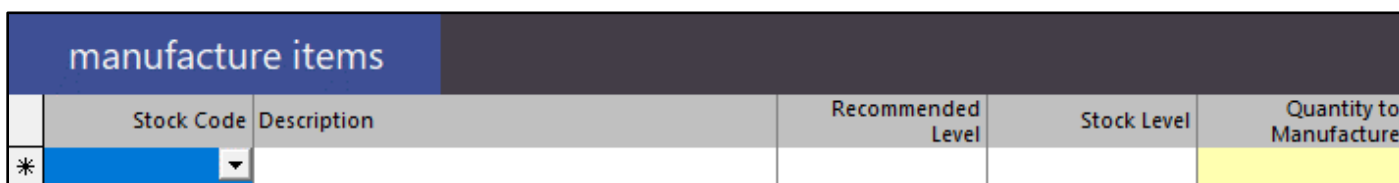

Items can either be added manually by adding the required items to the batch, or they can be added automatically via the Generate by Reorder Levels button.

To automatically add items to the batch:

Press the Generate by Reorder Levels button. Using the Generate by Reorder Levels button will automatically add any Stock Items that have a Stock Level which is below the recommended level. When using the Generate by Reorder Levels, the Quantity to Manufacture for each item will also be automatically filled to increase the Manufactured Stock Item's Stock Level to the recommended level. Note that pressing the Generate by Reorder Levels button will clear any existing Stock Items that have been added manually to the current batch.

To manually add items to the batch:

On the left-hand side of the screen, you will see a grid that shows the Stock Code, Description, Recommended Level, Stock Level and Quantity to Manufacture.

manufacture items					
	Stock Code	Description	Recommended Level	Stock Level	Quantity to Manufacture
*					

To begin, click on the dropdown arrow located in the Stock Code column.

	Stock Code	Description
*		

idealpos7 Update History

This will then display the Stock Items screen. The Stock Items screen will only show items which have the Manufactured Item flag enabled.

stock items		Code Search <input type="text" value=""/>	
Code	Description	Description 2	Department
<input type="text" value=""/>	<input type="text" value=""/>	<input type="text" value=""/>	<input type="text" value=""/>
126019	MUD CAKE	MUD CAKE	BULK
126031	MAYONNAISE 2L	MAYONNAISE 2L	BULK

Select the Manufactured Item that you want to Manufacture from the list by double-clicking on it, or alternatively select the item then press the OK button.

The Manufactured Item will be added to the Manufacture Item batch.
Enter the Quantity to Manufacture

manufacture items					
	Stock Code	Description	Recommended Level	Stock Level	Quantity to Manufacture
	126019	MUD CAKE	10	28.7	2
					

To add another item to the batch, click on the next available row and press the dropdown arrow.

manufacture items		
	Stock Code	Description
	126019	MUD CAKE
		

Repeat the above process to add any additional items to the batch.

Once you have added all items that need to be manufactured to the batch, press the Save button located at the bottom right corner of the screen

The screenshot shows a software interface for creating a batch. On the left, a table lists items to be manufactured:

Stock Code	Description	Recommended Level	Stock Level	Quantity to Manufacture
126019	MUD CAKE	10	28.7	2
126031	MAYONNAISE 2L	0	12	2

On the right, there are fields for:

- Batch Name: Manufacture Cafe Items
- Location: Location 1
- Manufacture Date: 16 May 2018 11:48
- Notes: Make before COB today

 At the bottom right, a 'Save' button is highlighted with an orange arrow. At the bottom left, there is a 'Generate by Reorder Levels' button.

The batch will appear on the Manufacture Batches screen

The screenshot shows the 'manufacture batches' screen with a table of existing batches:

ID	Batch Name	Location	Date Manufactured	Notes	Processed
28	Manufacture Cafe Items	Location 1	16 May 2018 11:48:33	Make before COB today	No

After a Manufacture Batch has been created, the Manufactured Items contained within the batch have not yet been manufactured, meaning that their stock levels have not been modified and the indirect items that make up the manufactured items have also not had their stock levels altered yet.

With the ability to create a batch containing multiple items, you may want to display and print off a report that contains a list of all the manufactured items. This will be beneficial for handing to the kitchen staff where they can use the report to see a list of items that need manufacturing, then tick off the items from the list as they've manufactured them.

idealpos7 Update History

To produce the report, select the batch from the list, then press the 'View' button located at the bottom of the screen.

This will display a report showing a list of Manufactured Items that have been added to the batch.

Idealpos user (pos1)	Manufacture Items		Printed 16/05/2018 1:19PM Page 1 of 1	
Manufacture Cafe Items	Location 1	Date 16/05/2018 11:48:33		
		Make before COB today	Quantity	
126019	MUD CAKE		2.0	<input type="checkbox"/>
126031	MAYONNAISE 2L		2.0	<input type="checkbox"/>

Like the other reports available in Idealpos, you can Print, Email, PDF or Export the report using the buttons at the top of the report screen

Close the report to return to the Manufacture Batches screen.

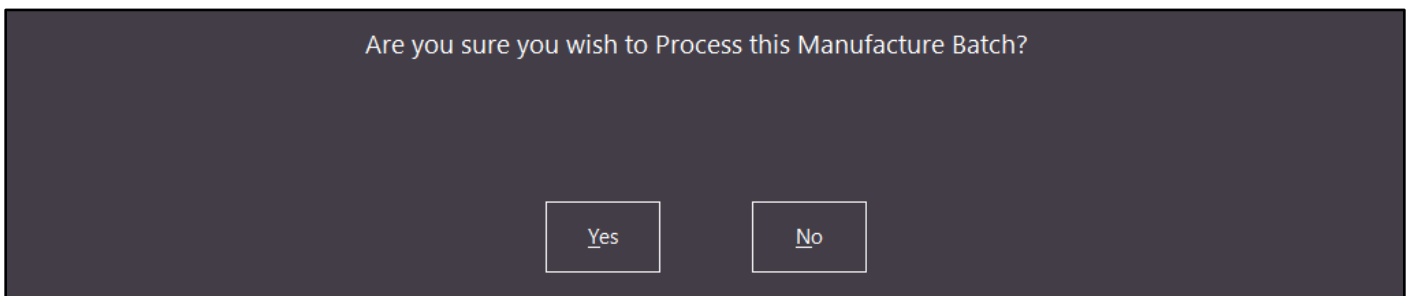

When there are multiple batches in the system, the View All button can be used to display all batches as a report, with each batch occupying one or more pages, depending on the number of items in the batch.

Once you're ready to process the batch, press the Process button located at the bottom right corner of the Manufacture Batches screen.

A confirmation prompt will be displayed.
Press 'Yes' to proceed with processing the Manufacture Batch.

The Manufacture Batch will be processed; all Manufactured Items that are included in the batch will have their stock levels increased and any indirect items that make up the manufactured items will have their stock levels decreased.

After the batch has been processed, the following message will be displayed indicating that the batch was successfully processed.

idealpos7 Update History

The Processed column on the Manufacture Batches screen will also change to 'Yes' which indicates that the batch has been processed.

ID	Batch Name	Location	Date Manufactured	Notes	Processed
28	Manufacture Cafe Items	Location 1	16 May 2018 11:48:33	Make before COB today	Yes

Once a batch has been processed, no further adjustments can be made to the items within the batch. Batches will remain in the Manufacture Batches screen until you delete them.

Additional features available on the Manufacture Batches screen are the ability to filter batches based on processed status.

- Show all batches will display all batches.
- Unprocessed Only will only show batches that have not been processed.
- Processed Only will only show processed batches.

Batches can be searched by name. Enter a batch name or part of a batch name and the Manufacture Batches screen will show any batches that match the entered name.

Batches can be filtered based on the manufactured period. Select a period from the list to show any batches which match the period selected

Items can also be manufactured from the POS Screen by setting up a POS Screen button using the Back Office Shortcut function.

To utilise this functionality, the POS terminal needs to be licenced for the Back-Office module. If your POS terminal is licenced for the Back-Office module, this can be setup as follows.

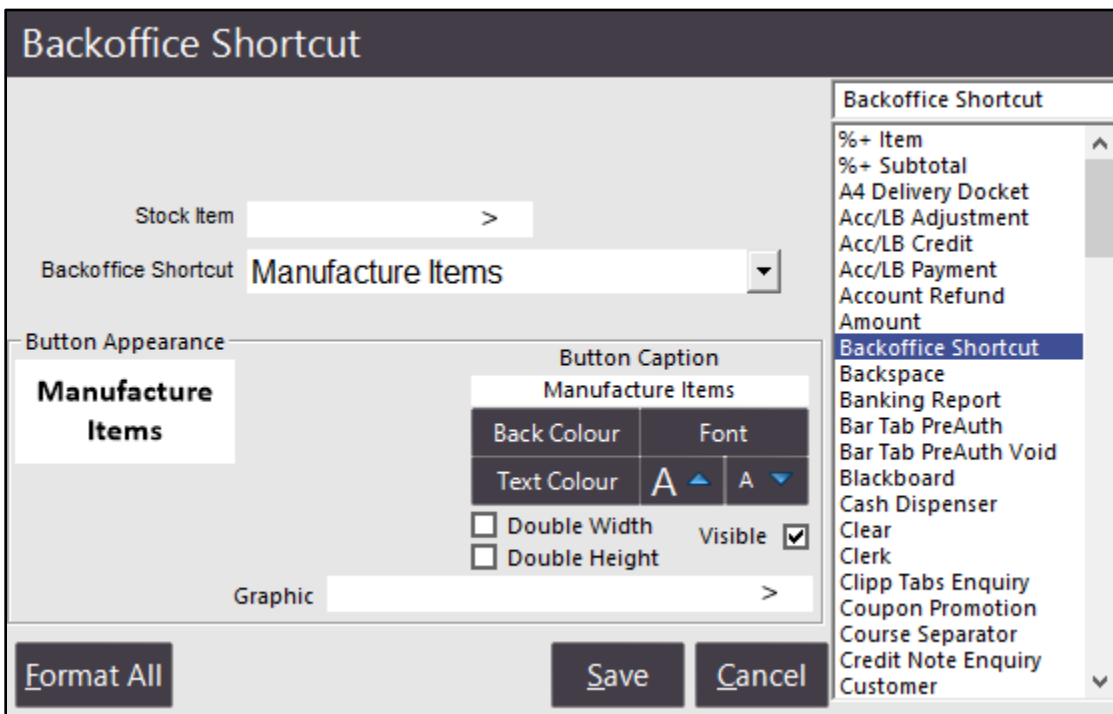

Go to Transactions > Stock Control > Manufacture Items > Add button > S button

A Shortcut will be created for the Manufacture Items function.

To create the button, go to Setup > POS Screen > POS Screen Setup > Select: POS Screen Layout > Buttons
Select an empty/blank button > Choose the Backoffice Shortcut option, Select Manufacture Items from the Back Office Shortcut dropdown option, enter a button caption of 'Manufacture Items' then press Save

Close the POS Screen editor and POS Screen layout, then open the POS Screen.
Press the Manufacture Items button.

The Manufacture Items screen will be displayed.

idealpos7 Update History

The Batch Name will be pre-filled with the POS terminal number followed by an incrementing number. When Manufacturing Items using the POS Screen, the batch is created and the items are manufactured at the same time after pressing the Process button.

Reports

Promotions Report – Option to Group by Location

This function adds the ability to Group by Site or Location when running the Promotions Report.

This feature is useful where you have multiple sites or locations and need to group the Promotions by Site or Location.

When running the report and selecting the Group by Site option, Promotions will be grouped by the Site at which they were triggered.

When running the report and selecting the Group by Location option, Promotions will be grouped by the Location at which they were triggered.

Go to Reports > Sales > Promotions

Select the Location option to group by Location

The screenshot shows a window titled "promotions report" with a close button (X) in the top right corner. The window contains several configuration sections:

- Date Range:** A dropdown menu set to "Today", and "From" and "To" date/time pickers. The "From" date is 22/05/2018 00:00:00 and the "To" date is 22/05/2018 23:59:59.
- Group by:** Three radio button options: "POS Terminal" (unchecked), "Location" (checked), and "Site" (unchecked).
- Report Type:** Two radio button options: "Promotion Summary by Type" (checked) and "Promotion Details by Item" (unchecked).
- Selection Range:** Three input fields with dropdown arrows: "Promotion Group", "Site", and "POS System".

At the bottom of the window, there are two buttons: "Print" on the left and "View" on the right.

Stock Manage

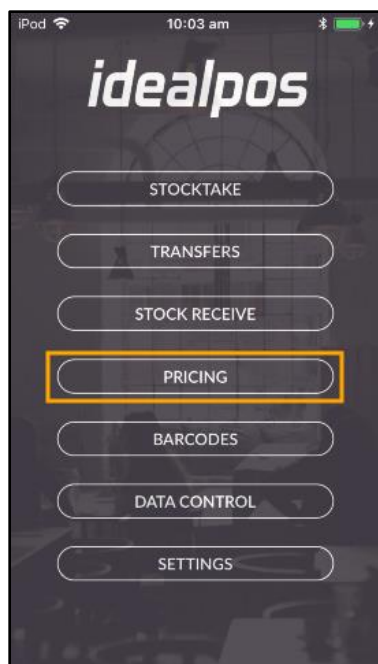

Support for Price Changes functionality

This function adds the ability for Idealpos to send Stock Prices to the Stock Manage app, as well as the ability to process Price Changes that have been performed from the Stock Manage app. In addition, the Pricing option in the Stock Manage app can be used to check the current price for a Stock Item, provided that the most recent data has been downloaded to the app. In order to utilise the Price Changes functionality, you will need to update your Stock Manage app on all your mobile devices.

If the Stock Manage app has not updated automatically on your device, it can be updated manually. If you are using an iOS device, open the App Store app, click on Updates, then click on the UPDATE text located next to the Stock Manage app under the Available heading. This will update the app on an iOS device.

If you are using an Android device, open the Google Play store app, click on the menu icon then click on My apps & games then under the Updates tab, look for the Stock Manage app and press the UPDATE button next to the app. This will update the app on an Android device.

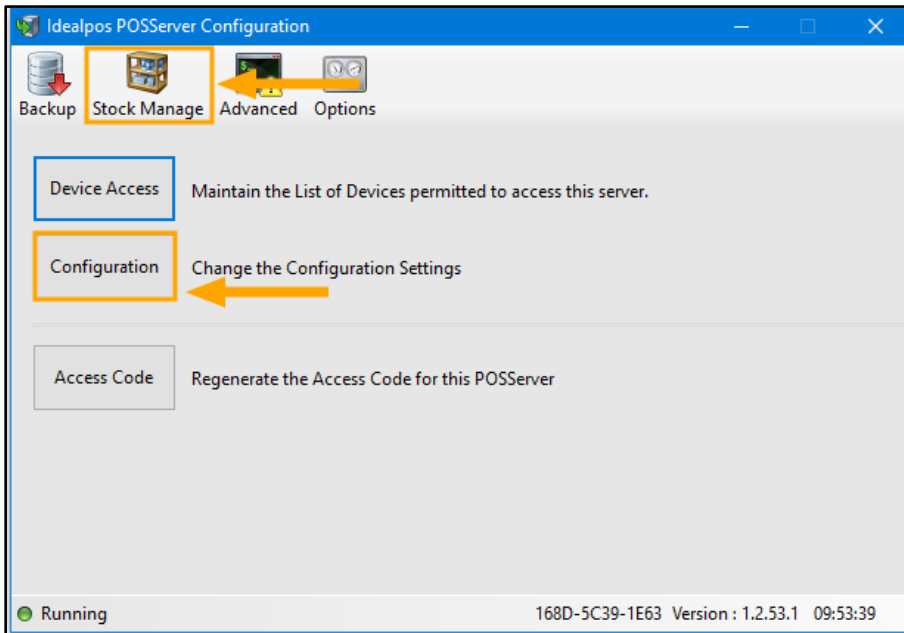

Once the Stock Manage app has been updated, the Pricing function will appear on the main menu of the Stock Manage app.

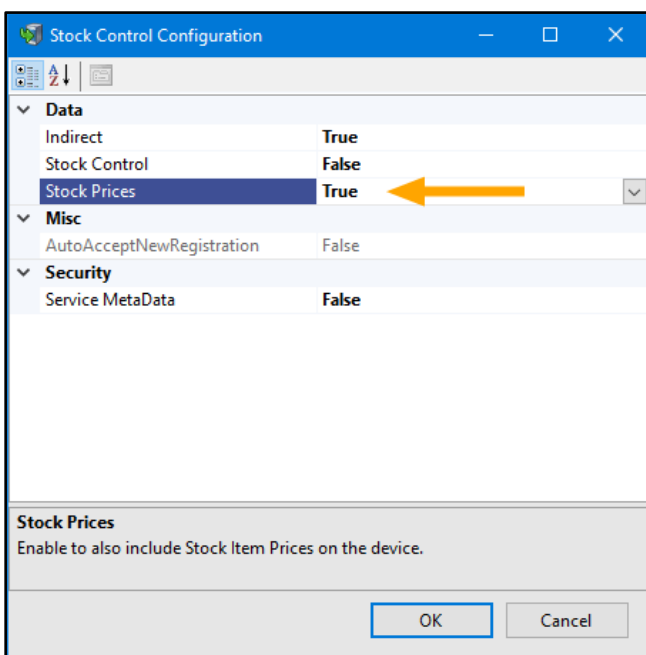

idealpos7 Update History

Before you can use the Pricing/Price Changes function, you need to enable Stock Prices in the POSServer. Open the POSServer application on your POSServer system. If you can't find the shortcut to open the POSServer, you may find it in the following location.
C:\Program Files\Idealpos Solutions\POSServer\POSServer.exe

After you've opened the POSServer application, click on the Stock Manage option at the top of the window, then click on the Configuration button

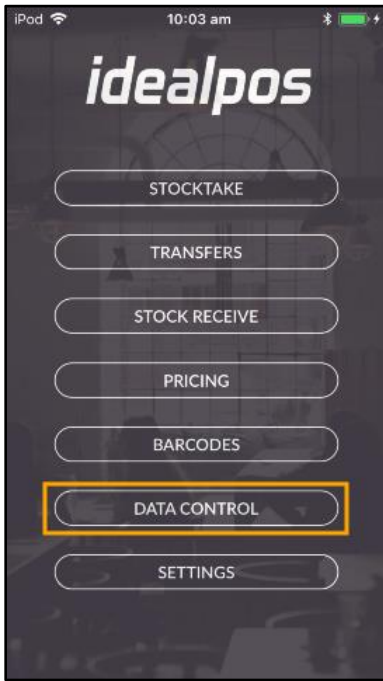

You will then need to enable the Stock Prices setting by setting it to 'True'. This can be done by clicking on the row that contains the Stock Prices setting, then clicking on the dropdown arrow and selecting the 'True' option. After this has been done, True should be displayed next to Stock Prices, as per the following screenshot.

Press OK to save the change, then close the Idealpos POSServer Configuration window by pressing the X on the top right corner of the window.

You will then need to download the latest data to the Stock Manage app from Idealpos which will include Stock Items and their Sell Prices. Open the Stock Manage app on your device then click on Data Control.

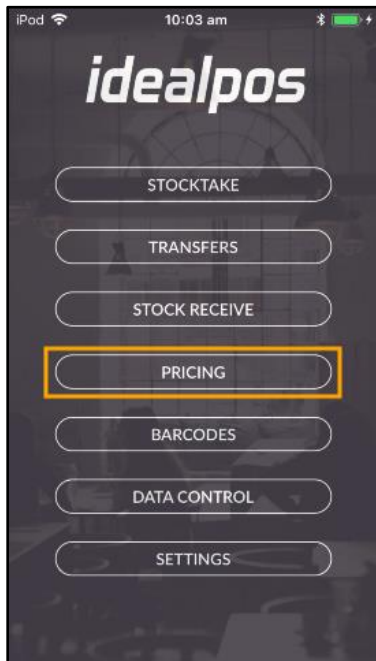

If you have any pending data on the device that needs to be uploaded, upload the data first by pressing the Upload button, then go to Idealpos and process it via the Stock Manage menu.

Once the data has been uploaded and processed, you may then download the data to the app. Doing this will download your Stock Items and their prices to the app, ready for use with the Stock Manage Pricing function. Press the Download button to download the data.

idealpos7 Update History

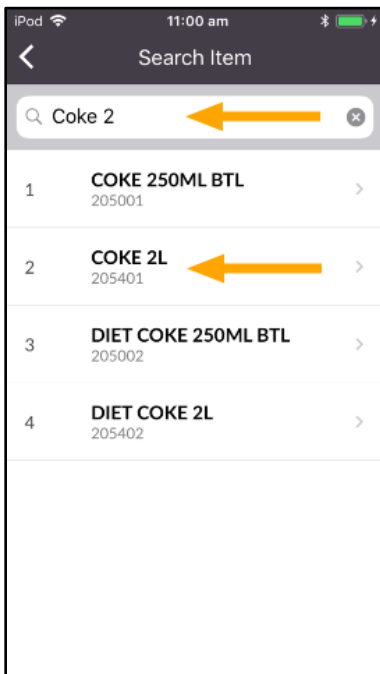

Once the data has been downloaded, you will return to the Stock Manage main menu. Select the Pricing button.

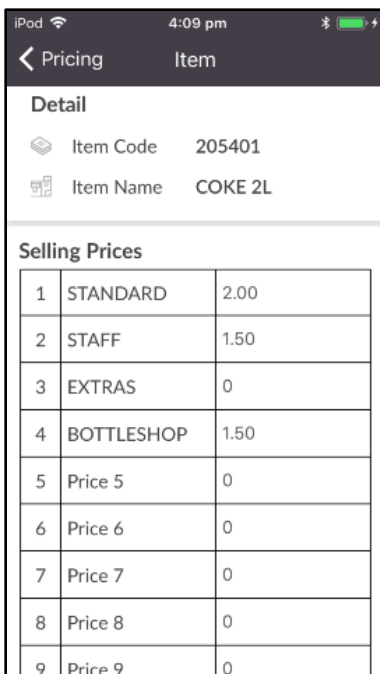

Then press the + button on the top right corner of the screen to search for a Stock Item which a Price Change will be performed against.

This will display the Search Item screen where you may enter the Stock Item description to search for the Stock Item. Once you find the item that you want, click on it.

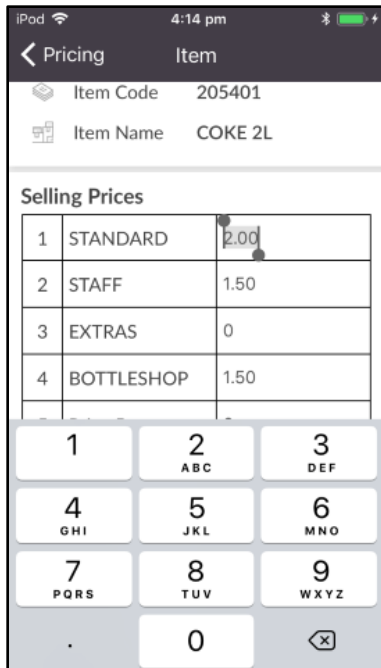

After clicking the Stock Item, the item will be displayed and show the Item's Selling Prices.

Alternatively, you may search for an item by scanning the Stock Item's barcode using the camera scan function, Linea Pro scanner or the GeneralScan Bluetooth scanner. If the Stock Item barcode exists, the Stock Item which matches the barcode will be displayed. If the barcode doesn't match any Stock Items in your system, you will see a Not Found message indicating that the barcode was not found.

idealpos7 Update History

To change the selling price of a Stock Item, click on the Selling Price that you want to change. A numeric keypad will be displayed and the Selling Price will be highlighted, ready for editing. The value that is entered will overwrite the existing value. Update the price by entering a new value.

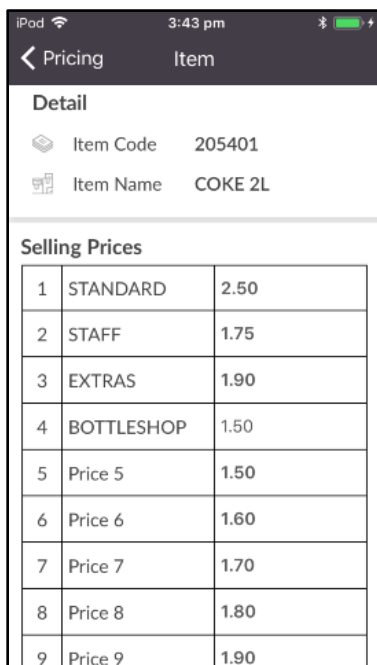

You may continue and update any other Price Levels that require changing. Once you have changed the selling prices for the item, press the Save button.

You will return to the Pricing screen. Any items that have had a Price Change will be displayed on this screen. To add price changes for any other Stock Items, press the + button on the top right corner and repeat the above process.

Also note that once a Price Change has been made for an item, the Price Change entry can be opened and modified if required. This can be done by clicking on a Stock Item from the Pricing screen.

Prices which have been changed will be displayed in bold as per the below screenshot.

The screenshot shows the 'Pricing' screen for an item named 'COKE 2L' with item code '205401'. Below the details is a table titled 'Selling Prices' with 9 rows. The prices for 'Price 5' through 'Price 9' are displayed in bold text.

Selling Prices		
1	STANDARD	2.50
2	STAFF	1.75
3	EXTRAS	1.90
4	BOTTLESHOP	1.50
5	Price 5	1.50
6	Price 6	1.60
7	Price 7	1.70
8	Price 8	1.80
9	Price 9	1.90

Any Stock Items that have had a Price Change made but no longer required can also be deleted.

Simply swipe from right to left on the Stock Item in the Pricing screen and the 'Delete' button will be revealed (the same way that you would swipe on an item in a Stocktake to delete it).

Press the 'Delete' button to delete the Price Change entry.

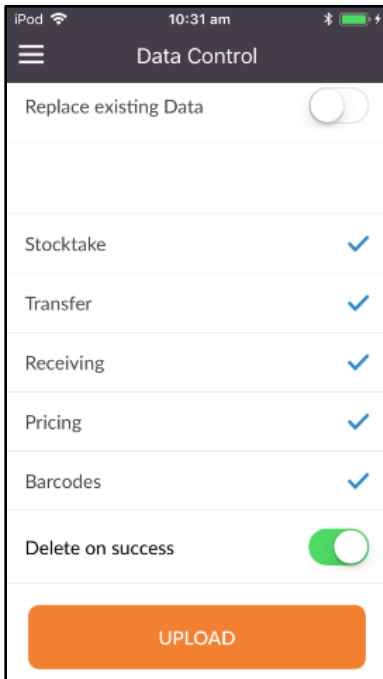

When deleting a Price Change entry, the Sell Price for the item will revert back to the original sell price that was downloaded from Idealpos.

Note that any price changes which have been made via Stock Manage will not be active in Idealpos until you upload the Pricing data to Idealpos then process it.

To upload the Price Changes, return to the main menu in the Stock Manage app, then click on the Data Control option. Finally, press the Upload button.

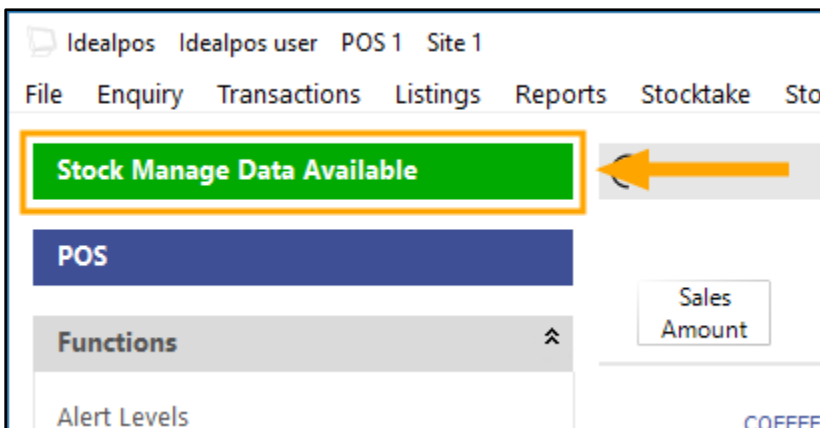

idealpos7 Update History

Any Price Changes on the device will be uploaded to Idealpos.

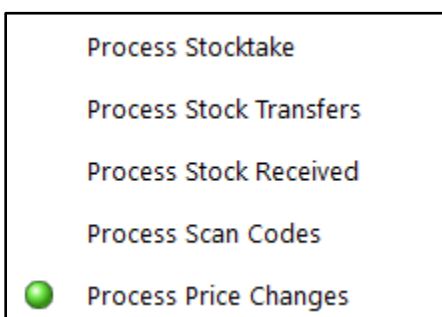

Before the price changes are applied in Idealpos, you will need to review them then process the changes.

Go to the Idealpos main screen; you will see that 'Stock Manage data is available' will be displayed on the main screen.

Click on the Stock Manage menu. The Process Price Changes option should show a green dot next to it, which indicates that there is Price Change data available for processing.

Select the Process Price Changes option by clicking on it.

You will see the following screen from where you may review the pending price changes.

price changes					
Stock Code	Description	Price Level	Old Price	Price	
205401	COKE 2L	STANDARD	2.00	2.50	
205401	COKE 2L	STAFF	1.50	1.75	
205401	COKE 2L	EXTRAS	0.00	1.90	
205401	COKE 2L	Price 5	0.00	1.50	
205401	COKE 2L	Price 6	0.00	1.60	
205401	COKE 2L	Price 7	0.00	1.70	
205401	COKE 2L	Price 8	0.00	1.80	
205401	COKE 2L	Price 9	0.00	1.90	
205401	COKE 2L	Price 10	0.00	2.00	
205401	COKE 2L	Price 11	0.00	2.10	
205401	COKE 2L	Price 12	0.00	2.20	

Delete Line Cancel All Process

Each Sell Price will be displayed on an individual line. This means that if you've changed multiple Price Levels for a Stock Item, there will be multiple entries for the Stock Item.

idealpos7 Update History

A Sell Price for a Stock Item Price Change may be updated by clicking in the Price field then updating the price. On a touchscreen or POS device, you may click on the dropdown arrow and update the price using the on-screen keyboard, then press the Enter button on the on-screen keyboard to update the price.

Updating the price is beneficial in the case that the operator may have accidentally entered the incorrect price via the Stock Manage app while making the change.

The screenshot shows the 'price changes' application interface. At the top, there is a title bar with the text 'price changes' and a close button. Below the title bar is a table with the following columns: Stock Code, Description, Price Level, Old Price, and Price. The table contains 13 rows of data for 'COKE 2L' items with various price levels. The 'Price' column for the first row is currently set to 2.50 and is highlighted in blue. Below the table is a large empty space. At the bottom of the screen, there is an on-screen keyboard. The input field at the top of the keyboard contains the text '3.50'. The keyboard has a standard QWERTY layout with additional function keys like 'CL', '\', '?', '0', '.', and '-'. A large blue 'Enter' button is located on the right side of the keyboard.

Stock Code	Description	Price Level	Old Price	Price
205401	COKE 2L	STANDARD	2.00	2.50
205401	COKE 2L	STAFF	1.50	1.75
205401	COKE 2L	EXTRAS	0.00	1.90
205401	COKE 2L	Price 5	0.00	1.50
205401	COKE 2L	Price 6	0.00	1.60
205401	COKE 2L	Price 7	0.00	1.70
205401	COKE 2L	Price 8	0.00	1.80
205401	COKE 2L	Price 9	0.00	1.90
205401	COKE 2L	Price 10	0.00	2.00
205401	COKE 2L	Price 11	0.00	2.10
205401	COKE 2L	Price 12	0.00	2.20

In addition, an individual price change may be deleted by clicking on the line and pressing the 'Delete Line' button at the bottom left corner of the screen. The selected Price Change will be removed from the Price Changes and will not be processed.

Stock Code	Description	Price Level	Old Price	Price
205401	COKE 2L	STANDARD	2.00	2.50
205401	COKE 2L	STAFF	1.50	1.75
205401	COKE 2L	EXTRAS	0.00	1.90
205401	COKE 2L	Price 5	0.00	1.50
205401	COKE 2L	Price 6	0.00	1.60
205401	COKE 2L	Price 7	0.00	1.70
205401	COKE 2L	Price 8	0.00	1.80
205401	COKE 2L	Price 9	0.00	1.90
205401	COKE 2L	Price 10	0.00	2.00
205401	COKE 2L	Price 11	0.00	2.10
205401	COKE 2L	Price 12	0.00	2.20

Buttons: Delete Line, Cancel All, Process

Finally, if Price Changes were uploaded in error and they are not required, the 'Cancel All' button may be used to delete all price changes from the list. Pressing the 'Cancel All' button will display a confirmation prompt and once you have confirmed that you want to cancel all price changes, they will be cleared and will not be processed into the system.

Are you sure you wish to Cancel these Price Changes?

Price Change batch deleted.

Once you are happy with the Stock Item price changes that are displayed in the list, you can produce a report of the changes by pressing the eye icon on the top right corner of the screen.

idealpos7 Update History

This will produce a report showing the price changes.

To apply the changes, close the report and press the Process button.

Process

This will process the changes into Idealpos. Note that displaying the report is not a requirement for processing the price changes, however may be beneficial for saving/printing in case you need to refer to the price changes that were processed.

A message indicating that the Price Changes have been processed will be displayed

Price Changes have been processed.

Tax Monitoring

Support for Fiji VAT Monitoring System

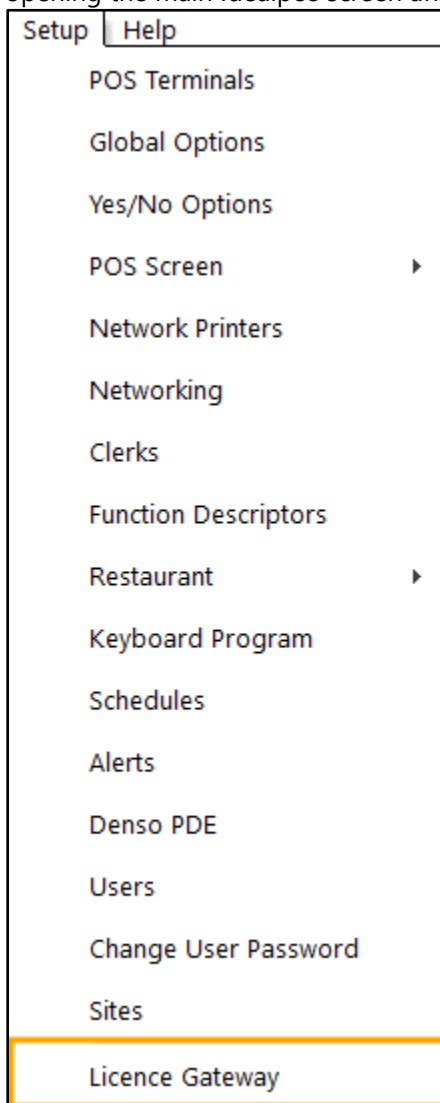

This function adds support for the Fiji VAT Monitoring System.

New law/regulation in Fiji has been enacted regarding Tax Administration/Monitoring. Businesses operating in Fiji will need to be compliant with the changes that have been enacted. For more information about the changes, please refer to the Fiji Revenue & Customs Service - <https://www.fracs.org.fj>

You may need to refer to the Fiji Revenue & Customs Service for more information regarding the specific URL, Port or PIN numbers that need to be configured.

To configure and use Idealpos with the Fiji VAT Monitoring System, the following steps need to be followed:

1. Add the Fiji Vat monitoring option to the Licence. This step will enable the Fiji VAT Monitoring options in the Idealpos interface. You will need to speak to our sales team who will be able to organise this for you. Once the Fiji Vat monitoring option has been enabled for your Idealpos Licence, you may confirm this by opening the main Idealpos screen and going to Setup > Licence Gateway

The Options column should include the option called Fiji Vat Monitoring

Product	Ver	Options	POS #	Scr#	Type	Expiry(D/M/Y)
IPS	7.0	Back Office + POS Screen, Quickbooks, IBA, Denso, Ideal Handheld 3, Stock Manage, Assembly Payments, Idealpos Reservations, Idealpos Restaurant, Fiji Vat Monitoring	1		Perpetual	

2. A Buyers TIN (Tax Identification Number) text field option needs to be added. Go to Setup > Global Options > Customers and add the Buyers TIN to the Text Fields

- The URL, Port, PIN and Buyer TIN Field need to be configured.

Go to Setup > Global Options > Interfaces 2

Select the Buyers TIN from the Buyer TIN Field option. The other options will need to be filled out using the details supplied by the Fiji Revenue & Customs Service. Please contact FRCS for more information.

The screenshot shows the 'global options' window for 'site 1 (Site 1)'. The 'Interfaces 2' tab is selected. The 'Tax Monitoring' section is highlighted with a yellow border and contains the following fields:

- URL: [] Port: 8180 Status: []
- PIN: [] Verify: []
- Buyer TIN Field: Buyers TIN []

Other sections visible include:

- Web Ordering via Ideal WebIT:** Web Order Tender (POINTS), Web Order Location (Current Store Location), Web Order Clerk (Online), Default Customer Type (ONLINE), Unmatched Items Link (>), checkboxes for 'Automatically Send Orders to Kitchen Printers' (checked) and 'Automatically Finalize Prepaid Web Orders' (unchecked), Price Level Link (STANDARD), Sale Type Link (No Sale Type), and delivery options (STANDARD, Pickup, Delivery).
- Web Reporting:** Export Format (No Web Reporting), Store ID, FTP Address, Automatically Upload Transactional Data Every (15 Minutes), Automatic Upload of File Data Time (2:00).
- Fuel Console Interface:** Interface Type (No Fuel Console Interface), Attendant Password, and a list of grades (Grade 1-15) with corresponding product codes (e.g., COKE 1.25L).
- Customer Interface:** Interface Type (No Customer Interface), Tender Type Link (No Tender Type), IP Address/Host, Username, Password, and Venue ID.

- Adjust the QR Code size. We have used a QR Code Size of 4, however, you may find another size may you're your setup better.

Go to Setup > Global Options > Printing

The screenshot shows the 'QR Codes' configuration section. The 'QR Code Size' is set to 4 (with a range of 2-9) and is highlighted with a yellow box. Other options include:

- Print on Coupons
- Print on Receipt Footer
- Receipt QR Code Data: []
- Text underneath Code: []

idealpos7 Update History

- Configure the Tax Descriptions and Tax Rates
The Tax Descriptions/Labels must be explicit
Go to Setup > Global Options > Sales

The screenshot shows the 'global options' window with the 'Sales' tab selected. The 'Tax Rates' section contains the following table:

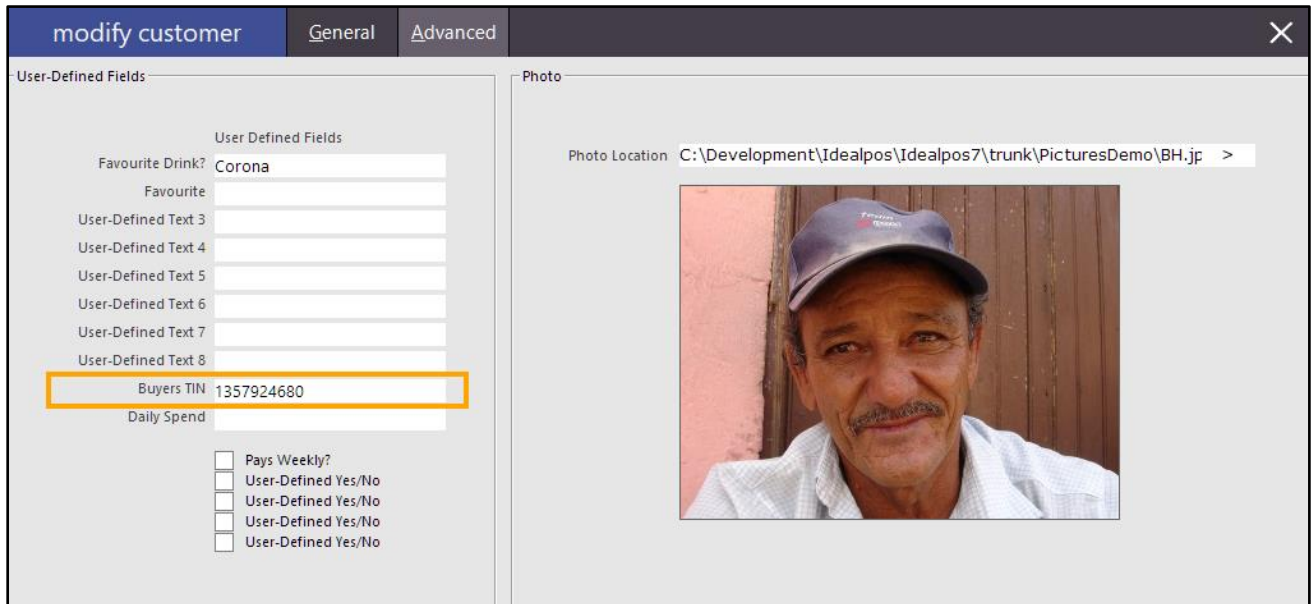

Default	Description	Rate	Label	VAT
<input checked="" type="checkbox"/>	VAT	9.000	A	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/>	STT	6.000	E	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/>	ECAL	10.00	F	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Not Defined	0.000		<input type="checkbox"/>
<input type="checkbox"/>	Not Defined	0.000		<input type="checkbox"/>
<input type="checkbox"/>	Not Defined	0.000		<input type="checkbox"/>

Below the table is a checkbox labeled 'Show Rates next to items on Receipt' which is currently unchecked.

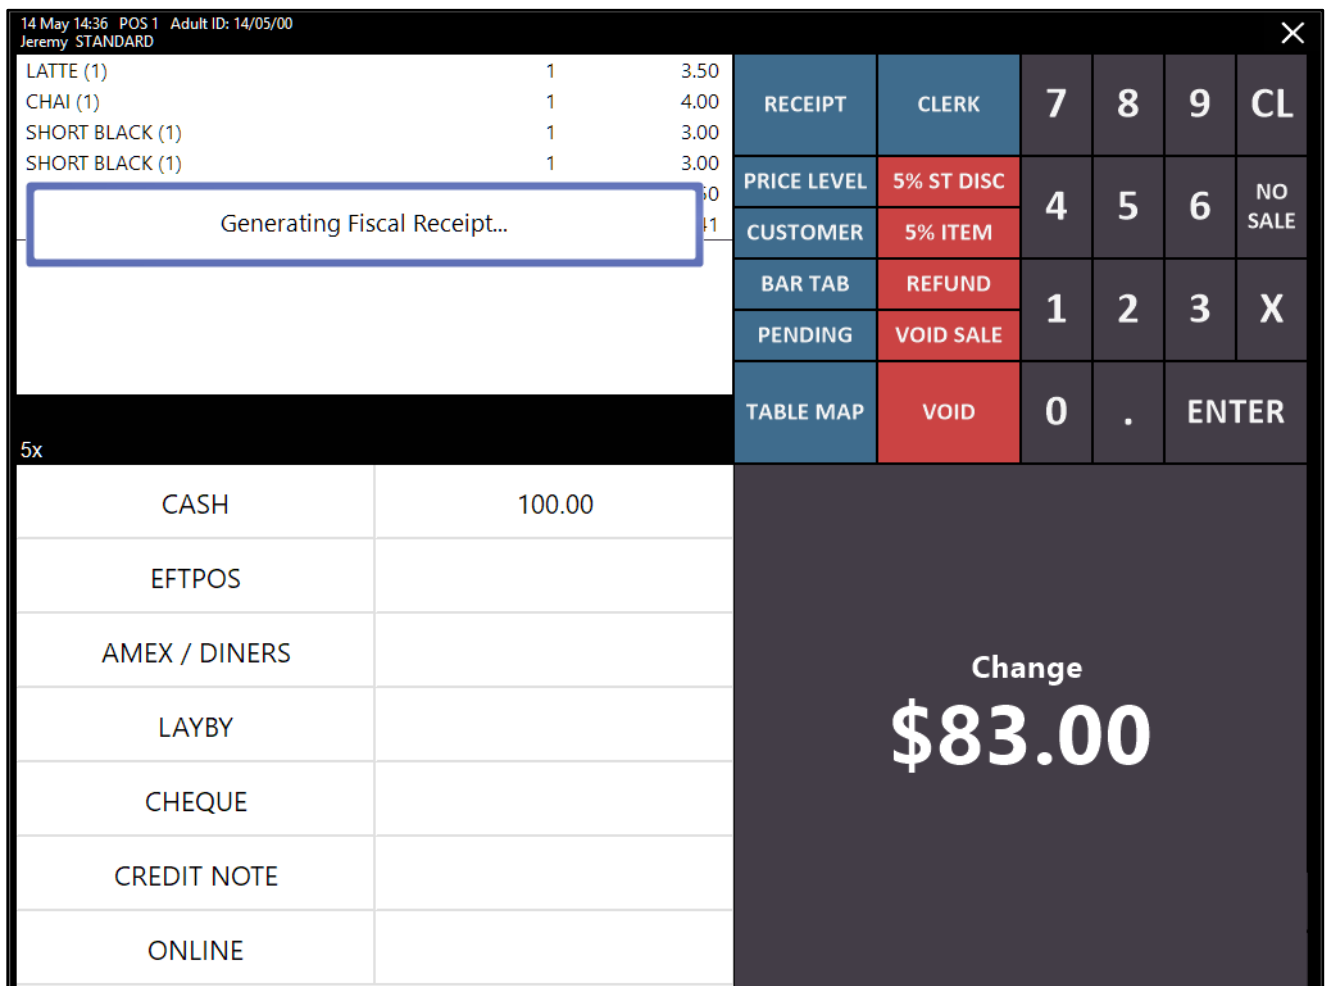

The Tax Labels supplied for use with the Fiji VAT Monitoring System are listed below for reference, however, we recommend that you refer to the FRCS for the latest information regarding Tax Labels and rates.

Tax Labels				
Name	Abbr	Tax Label	Rate/Amount	Note
Value Added Tax	VAT	A	9.00 %	
		B	0.00 %	Applies to exported goods and services only
Service Turnover Tax	STT	E	6.00 %	
Environment Climate Adaptation Levy	ECAL	F	10.00 %	
Plastic Bag Levy	PBL	P	0.10 FJD	Available for test from December 10 th 2017

- Setup the Customer TIN (Tax Identification Number) if required.
Go to File > Customers > Customers > Select Customer > Modify > Advanced > Enter the TIN into the Buyers TIN field

- When a sale is completed at the POS, a Fiscal receipt will be generated

idealpos7 Update History

- To refund a transaction or to refund items from a previous transaction, press the Refund button on the POS screen and select a previous transaction
