Promotions

Importing Promotions supports Family Attribute Linking

This function allows you to import promotions that are linked within a family. If one of the items imported is within a family, the other items within the family will be imported automatically.

Go to File > Sales > Promotions > Promotions > Import.

A *family* item is any item that has been linked to the designated Family Stock Item Attribute. This can be set by going to Setup > Global Options > Other Options > Stock Item Linking > Attribute Type.

More information on linking stock items to attributes can be found [here](#).
More information on importing promotions can be found [here](#).

Customer Display

Customer Display - option to Skip Images Larger than specified size

This option allows you to set an image file size upper limit. Any image larger than that size contained within the Pictures folder will not display on the Customer Display screens.

Go to Setup > POS Terminals > Modify > Customer Display > Customer Display Screen > Skip Images Larger than/KB.
