

The UniPage Notify V2 Restaurant Paging system alerts guests when their meals are ready for collection.

A Notify V2 Restaurant paging system helps manage queues and turns waiting customers into happy customers.

The Notify V2 Restaurant Pager has some very unique features that set it apart from other standard paging systems.

Key Features:

- ✓ Standard AAA user replaceable battery (URB)
- ✓ IMPACT Resistant Design (IRD)
- ✓ Advanced Locking Stud (ALS)
- ✓ Easily Expandable
- ✓ Beep/Flash/Vibe Alerts
- ✓ Protected against water/dust
- ✓ Powerful Transmitter

Suitable For

- ✓ Clubs and Pubs
- ✓ Bistro/Restaurants
- ✓ Food Courts
- ✓ Car Wash
- ✓ Doctors Surgery

Rounded edges - IMPACT RESISTANT

The Impact Resistant DISC (IRD) design makes it tougher and more reliable than any other shape or size pager i.e. The DISC is designed to roll if dropped thereby the drop force is evenly distributed preventing damage.

**Standard AAA
User Replaceable Batteries**

User replaceable battery (URB) There is no need to return the pagers, to the supplier for simple battery changes.

This features lowers overall maintenance costs. A single charge permits the pager to operate for up to 2 days.

**Advanced
Locking
Stud**

The advanced locking stud (ALS) enables staff to quickly stack the pagers. They are firmly locked together enabling them to charge without being knocked over easily.
